

Supplier Development Agreement & Statement of Work

Document ID: SOW-2026-APEX-01 | Version: 1.0 | Date: June 21, 2026

1. Parties and Scope

This Agreement is entered into by and between **Apex Software Solutions** ("Supplier") and the **Product Team** ("Client"). Under this Statement of Work (SOW), the Supplier will provide software development services to design, build, and deploy the **Document Collaboration Module V2.1** as described in the technical specifications.

2. Services to be Delivered

- **Frontend UI Development:** Implementation of all user interface components matching client-approved Figma wireframes, ensuring responsive layout and accessibility.
- **Backend API Integration:** Core server-side coding utilizing the section-based locking synchronizer to support collaborative block editing.
- **Redis Caching Layer:** Setup and integration of a single-instance Redis cache to support performance requirements.
- **Staging & Quality Assurance Support:** Deployment to a staging environment and active participation in bug resolution during the Client's manual testing phase.
- **Production Launch Support:** Launch monitoring, including 10 hours of post-go-live standby support.

Note on Out-of-Scope Work: Any requests outside the defined deliverables (such as multi-region DB replication or third-party CRM integrations) will be treated as ad-hoc services and billed at the standard rate of **\$75/hour**, subject to written change orders.

3. Payment Terms and Milestones

Payment shall be structured around the following project milestones, invoiced upon completion and sign-off:

- **Milestone 1: Down Payment** – 20% (\$10,000) due upon execution of this contract to initiate design and architectural setup.
- **Milestone 2: Frontend Delivery** – 30% (\$15,000) due upon deployment of the mock UI components to the developer environment and client visual approval.

- **Milestone 3: API & Redis Integration** – 30% (\$15,000) due upon successful deployment to staging and verification of the 2-second synchronization window.
- **Milestone 4: Final Sign-off** – 20% (\$10,000) due within 30 days of production launch and client final acceptance.

Standard payment terms are **Net-30** from the date of invoice receipt. Ad-hoc hourly services will be invoiced monthly on a **Net-15** basis.

4. Performance & Environment SLA

- **Staging Environment:** Supplier guarantees 99.0% uptime for the developer staging environment during the verification phase, excluding scheduled maintenance.
- **Warranty Period:** Critical bugs (severity 1 or 2) reported during the 30-day post-launch acceptance window will be patched within 48 hours at no additional charge.
